

BBA Chapter 16 — Peal Infinitive Construct Drill

Peal Infinitive Construct · Strong and Weak Roots · Daniel and Ezra

For each numbered infinitive construct form drawn from Daniel or Ezra, identify the Root (three root consonants, Peal perfect 3ms form), the Prefix and its meaning (le = purpose/complement "to"; ke = temporal "when/upon"; none = bare verbal noun), and provide an English translation of the full infinitive phrase. Forms cover strong roots, l-nun (nun retained), l-aleph (tsere prefix), hollow ll-waw (tsere + yod prefix), III-he (aleph-tsere ending), and l-ayin (seghol prefix). Items 18-20 are Haphel infinitives (le-ha- prefix) — a preview of Ch21.
