

Chapter 32 — Piel–Pual Contrast Drill

BBH Chapter 32 · Pual Strong Verbs

Part A: active/passive pairs from the same root — identify stem and translate. Part B: 15 mixed forms (Piel / Pual / Hiphil / Hophal) — identify stem, conjugation, PGN, and root. Answer key is on the last page.

Piel diagnostic: Hireq / tsere under prefix + Dagesh Forte in R2. Pual diagnostic: Qibbuts under R1 + Dagesh Forte in R2 (■ rejects dagesh → compensatory lengthening to qamets: ■■■■■■■■■■). Hophal: qibbuts under prefix consonant OR shureq for l-yod/Biconsonantal. Hiphil: Hireq under ■■ (perfect); patach under prefix (yiqtol/wayyiqtol).

Part A — Active / Passive Pairs

#	Root	Form A	Stem A	Form B	Stem B	Translation A / B
1		הַ		מְבַרֵּךְ		
2		קָ		יִ		
3		וְקִדְּשֵׁתִי		יִ		
4		יִוֹלֵד		יֵלֵד		
5		יִ		יִכְסֹה		

Part B — Mixed Forms: Piel / Pual / Hiphil / Hophal

#	Form	Stem	Conjugation	PGN	Root
6	מְבַרֵּךְ				
7	תְּבַרֵּךְ				
8	יֵלֵד				
9	יִכְלוּ				
10	יִכְסֹה				
11	יִכְסֹוּ				
12	יְבַרֵּךְ				
13	יֵגֵד				
14	וְיִקְדֹּשׁ				
15	יִקְדֹּשׁ				
16	שָׁנָה				
17	קָדַשׁ				
18	הוֹקֵם				
19	הִקְדִּישׁ				
20	יָאֵר				

Reflection Questions

1. The Pual diagnostic is "qibbuts under R1 + dagesh in R2." Item 6 () has qamets, not qibbuts, under . What phonological rule explains this? Compare item 20 () where the aleph also rejects dagesh.
2. Items 13 (Hophal) and 8 (Pual) both start with qibbuts. How do you distinguish a Hophal from a Pual when both use qibbuts?
3. Item 4: () is Hiphil, not Piel, even though both are active. What features identify it as Hiphil rather than Piel?

Answer Key — Part A

#	Root	Form A	Stem A	Form B	Stem B	Translation A / B
1		תְּבַרַּךְ		מְבַרַּךְ		
✓	תְּבַרַּךְ	תְּבַרַּךְ	Piel	מְבַרַּךְ ()	Pual	you bless / is blessed (→ qamets)
