

Chapter 34 — Hithpael Semantic Function Sorting

BBH Chapter 34 · Hithpael Strong Verbs

Classify each Hithpael verb: R (Reflexive), RC (Reciprocal), IT (Iterative/Frequentative), ES (Estimative/Declarative), or DN (Denominative). Answer key is on the last page.

R = Reflexive (subject acts on itself) | RC = Reciprocal (subjects act on one another) | IT = Iterative/Frequentative (repeated or habitual action) | ES = Estimative (subject presents itself as being in a state) | DN = Denominative (derived from a noun)

1. ■■■■■■ appears 5 times (items 1, 3, 6, 8, 13). Why is this Iterative rather than Reflexive? What does "walking about" add that a single-step Qal walk does not?
2. Item 12 (■■■■■■■■■■■■■■■■■■■■, Gen 22:18) can be translated "bless themselves" (R) or "be blessed" (passive). What would change if you read this as passive?
3. Items 24–25 are Estimative. What does the Hithpael add to ■■■■■■ and ■■■■■■ that the Qal of the same root would not express?
